COMPUTER ENGINEERING

QUEZON CITY

COURSE CODE/TITLE:	CPE 031	**SECTION:**	CPE21S1
DATE PERFORMED:	August 1, 2026	**DATE SUBMITTED:**	August 1, 2026
NAME:	Mendoza, Ryo Shin P.	**INSTRUCTOR:**	Engr. Jimlord Quejado

ACTIVITY NO. 3 Explore CopyAI

1. PROCEDURE OUTPUT

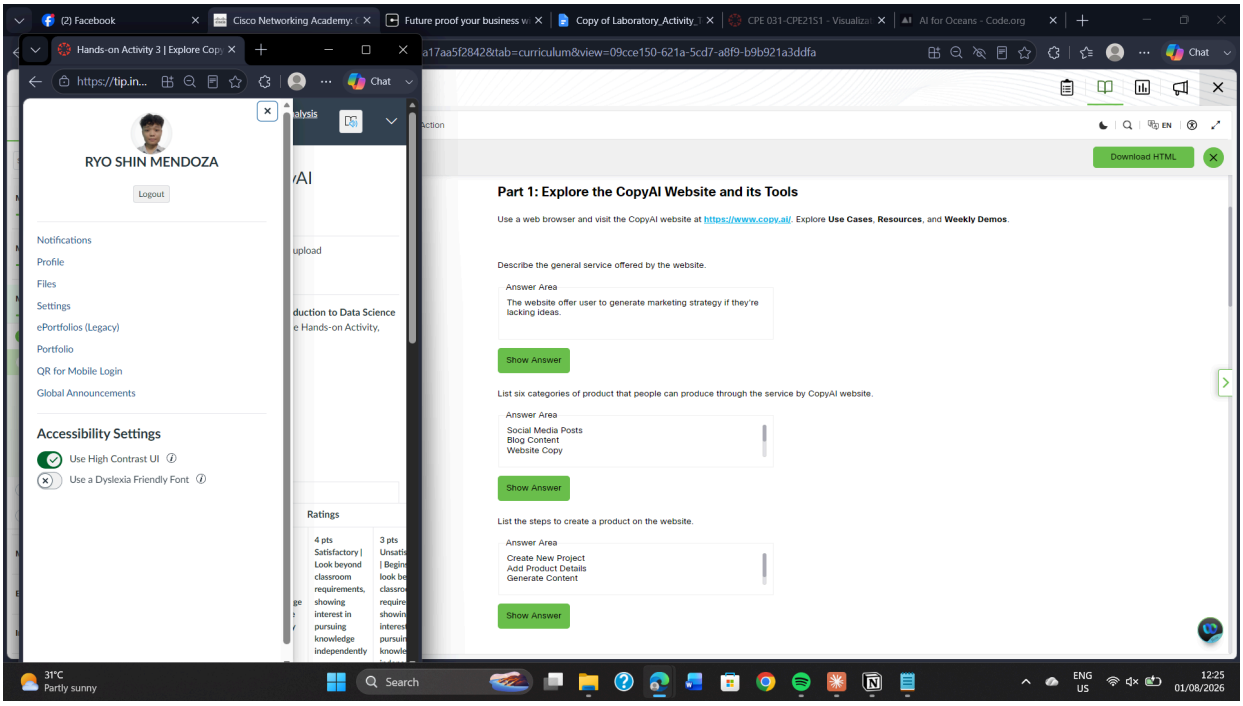

Figure 1.1: Exploring the website

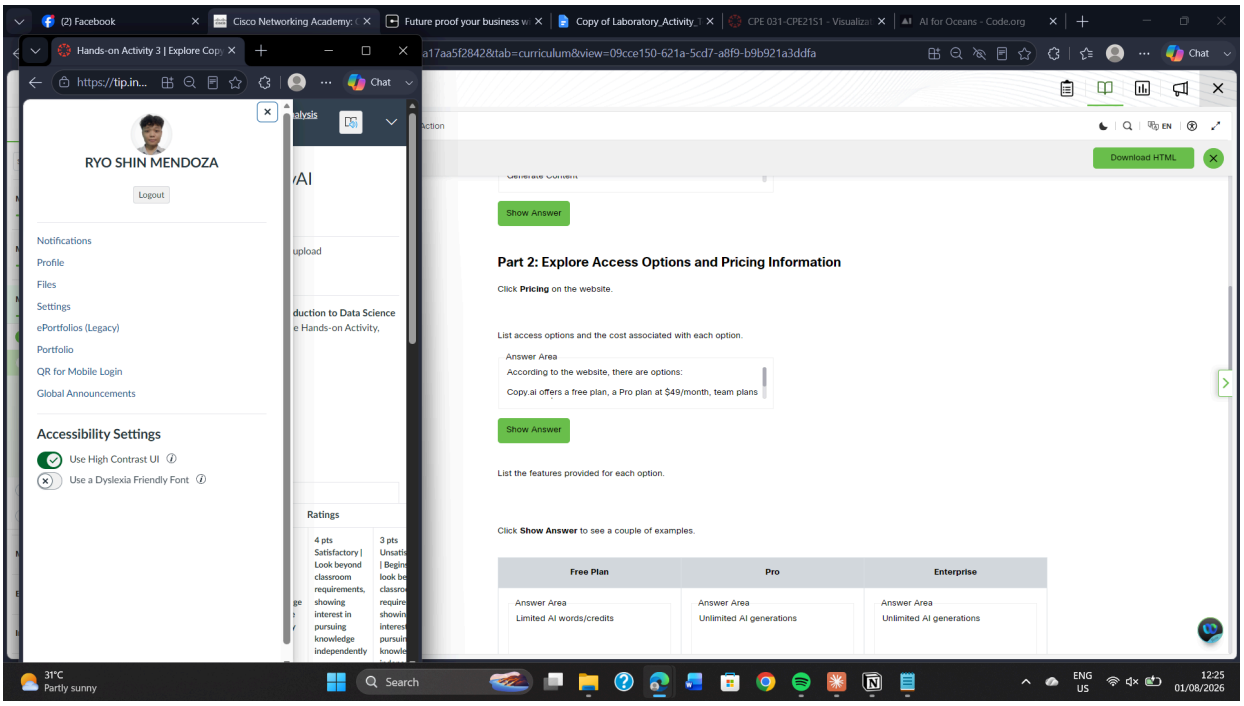

Figure 1.2: Exploring the access and options

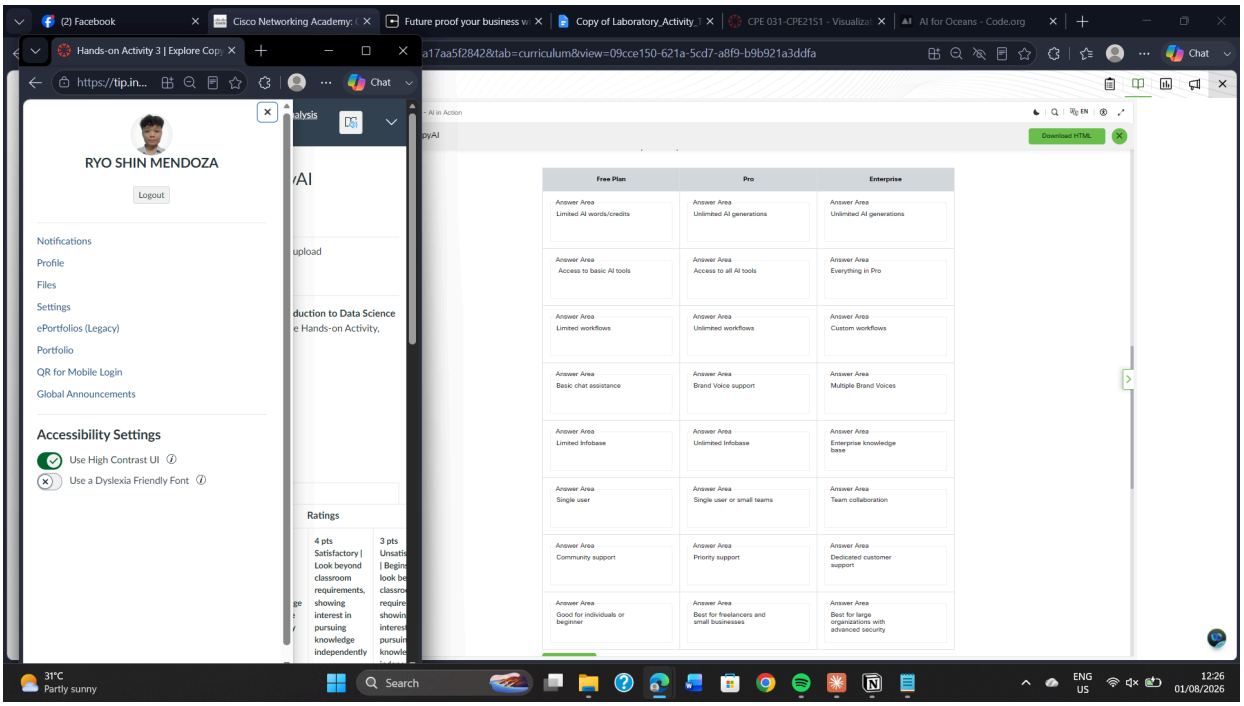

Figure 1.3: Kinds of subscription

In this activity, I learned about a website called Copy.ai. This website helps people create marketing content, like ads and social media posts, using AI. Instead of writing everything by hand, Copy.ai gives quick ideas that

businesses can use.

I looked around the website and checked its different tools. I also checked the pricing page to see how much it costs to subscribe. There are different plans, from free to paid, depending on what a person needs.

This activity helped me understand that AI tools like Copy.ai can save time and help businesses with their marketing, even for small businesses or individual users.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

STEP 1

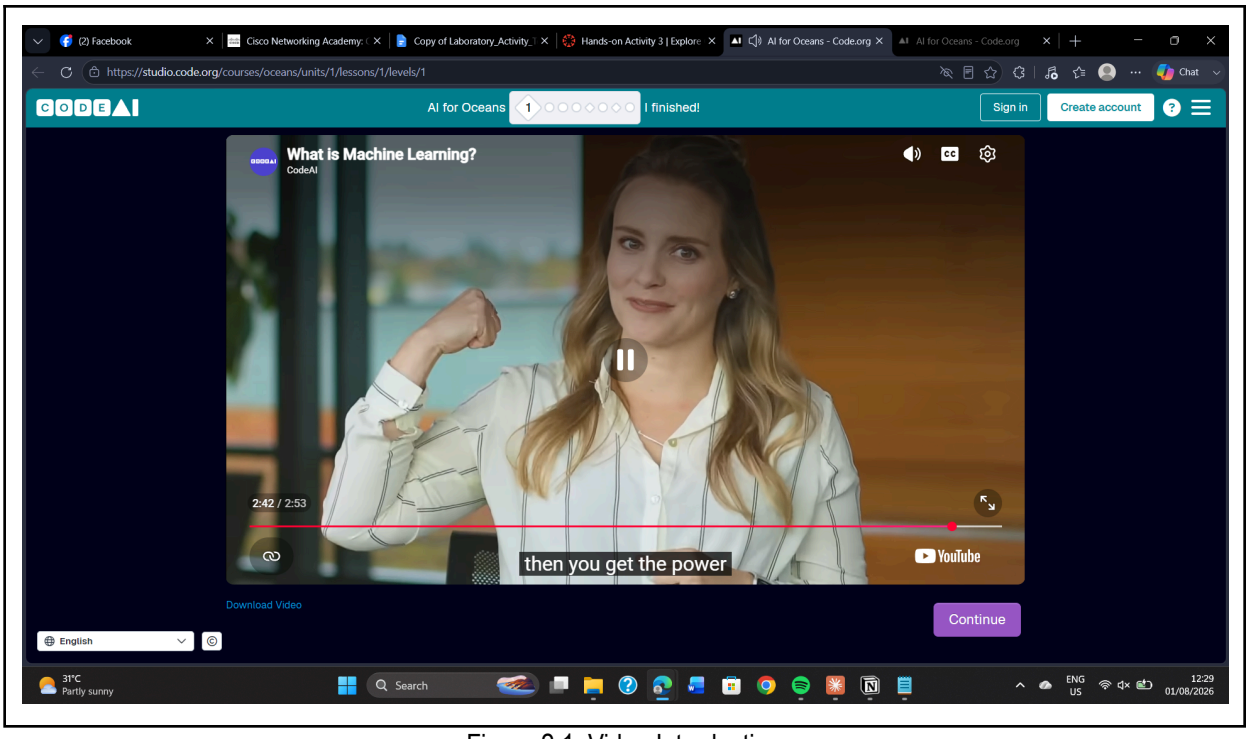

Figure 2.1: Video Introduction

After clicking the start, the video showed up and it's about machine learning. The video explained that machine learning is a way for computers to learn from examples instead of being told exact rules.

STEP 2

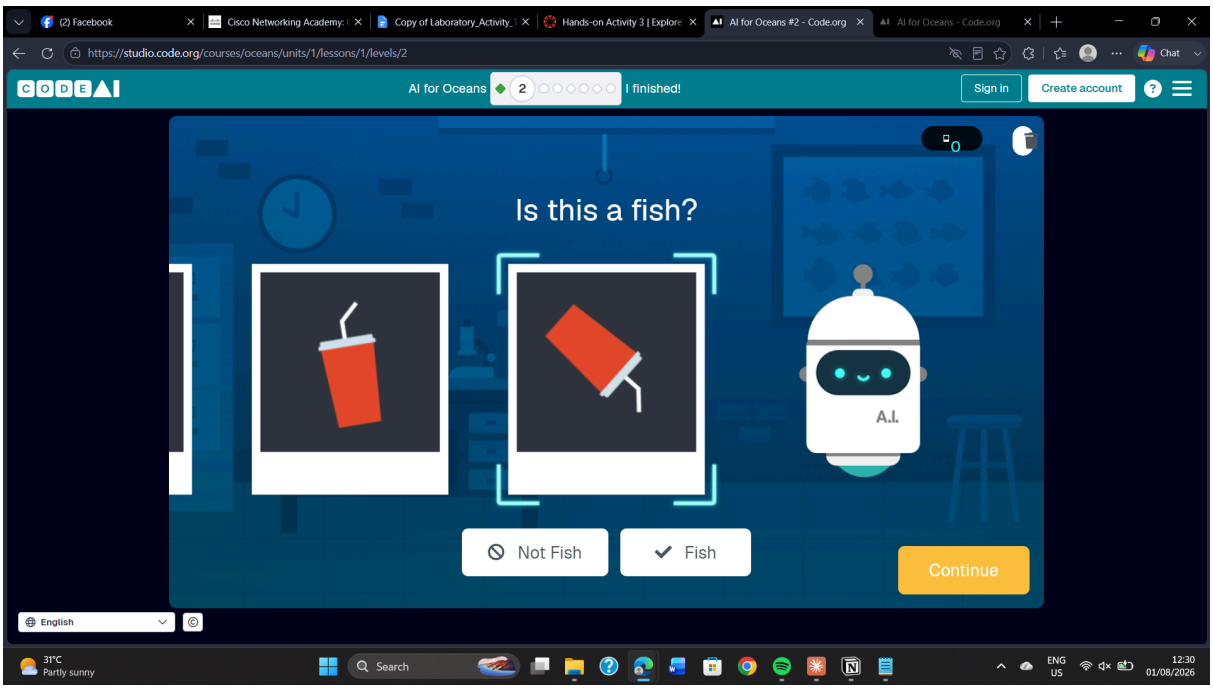

Figure 2.2.1: Fish detection

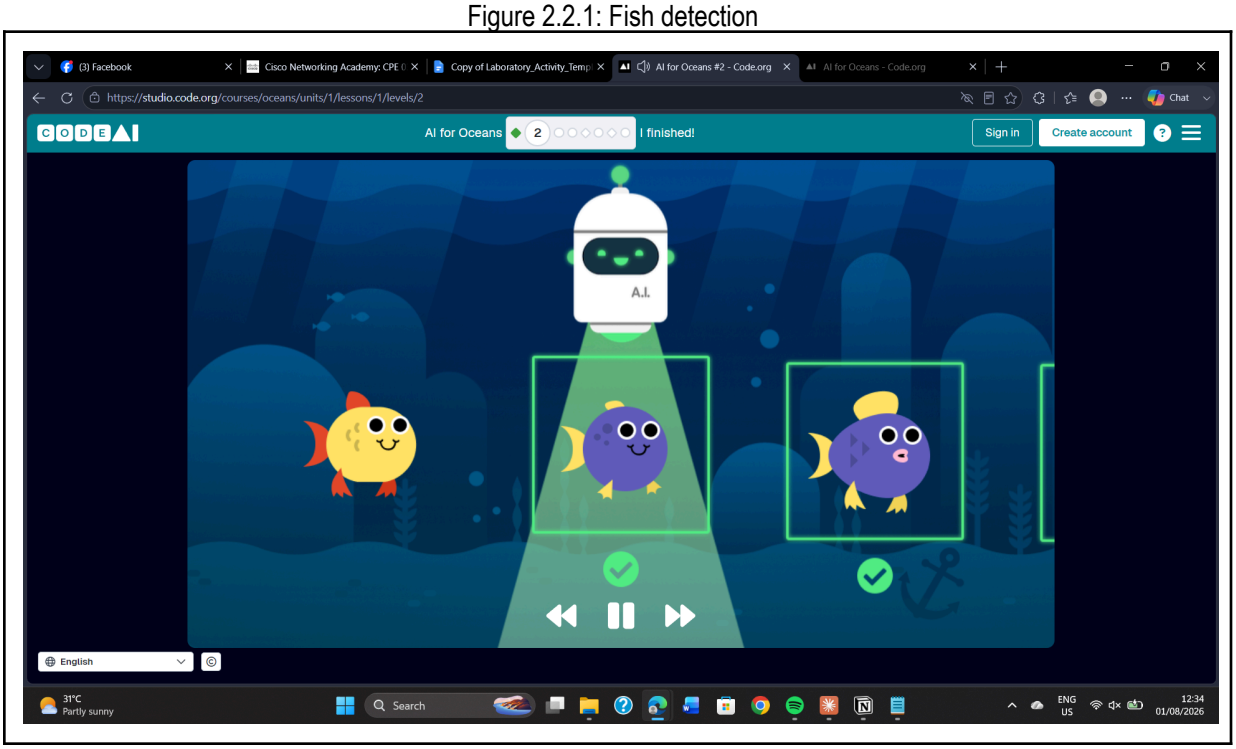

Figure 2.2.2: Correct fish detection

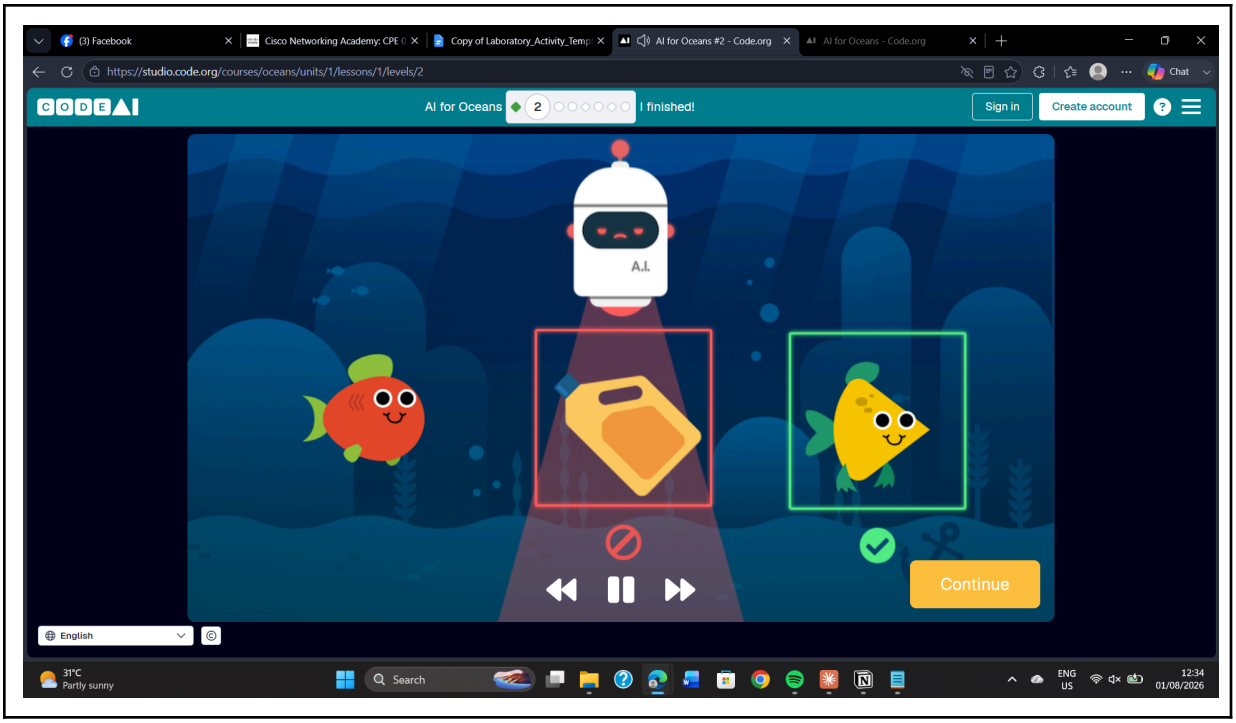

Figure 2.2.3: Non-fish detection

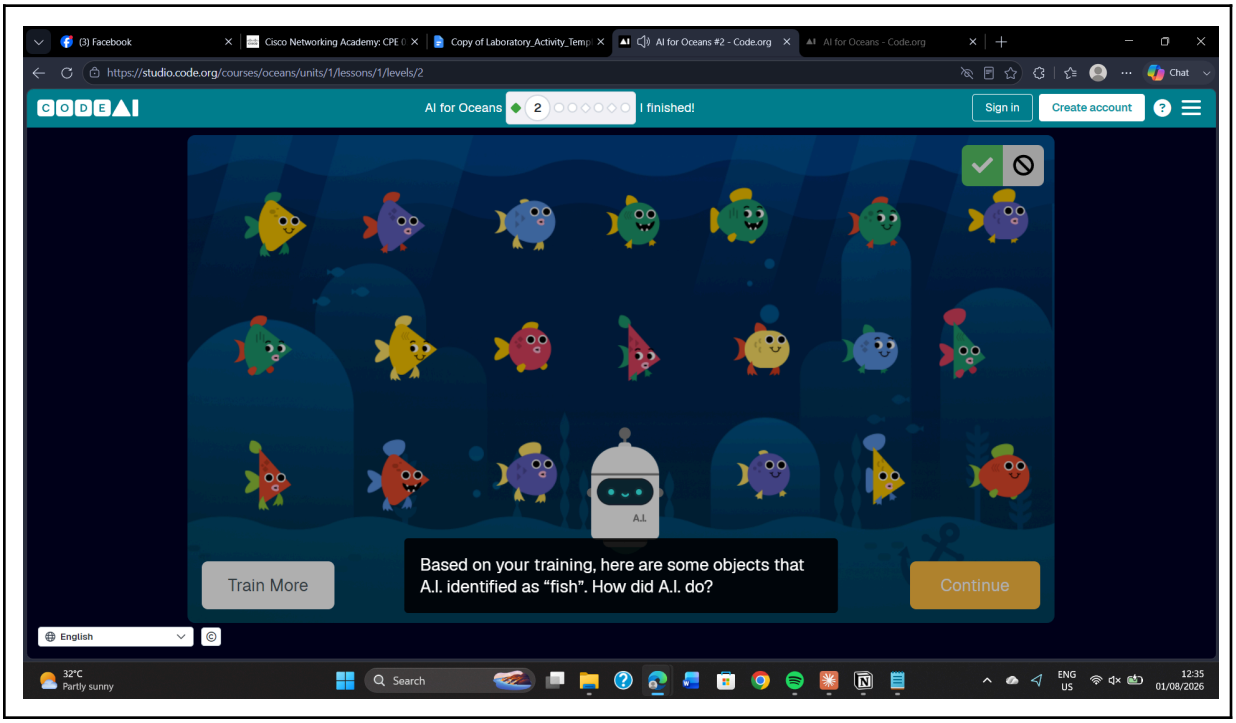

Figure 2.2.4: Data Collected by AI

STEP 3

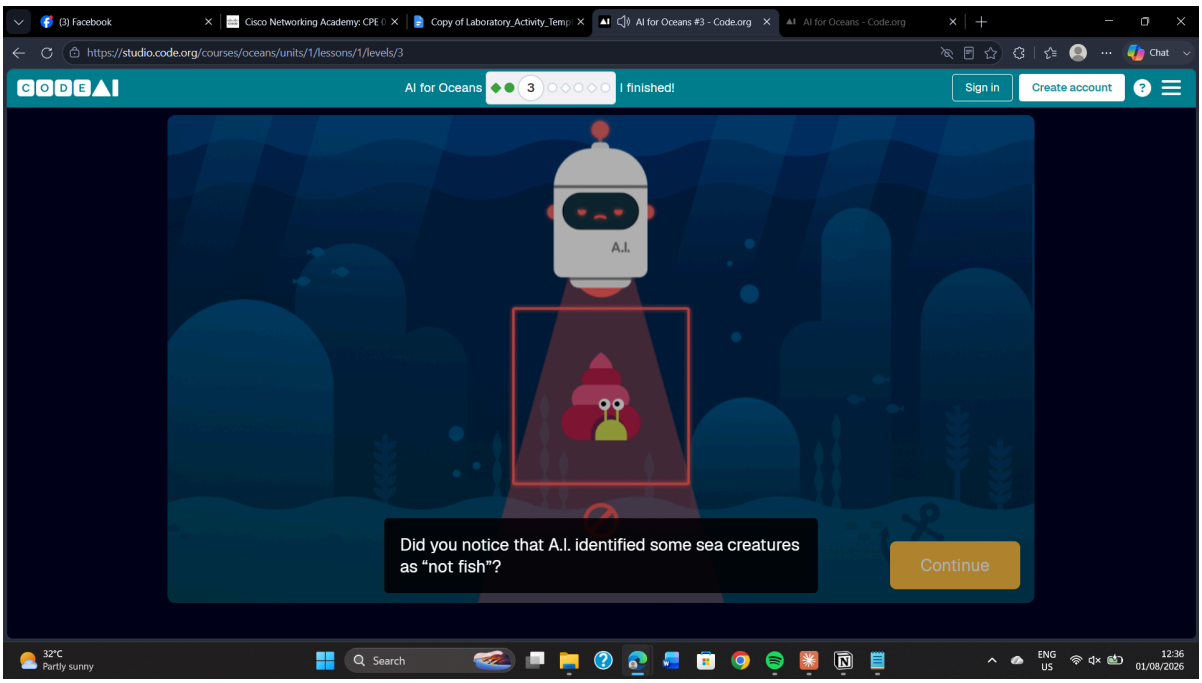

Figure 2.3: Another Non-fish detection

STEP 4

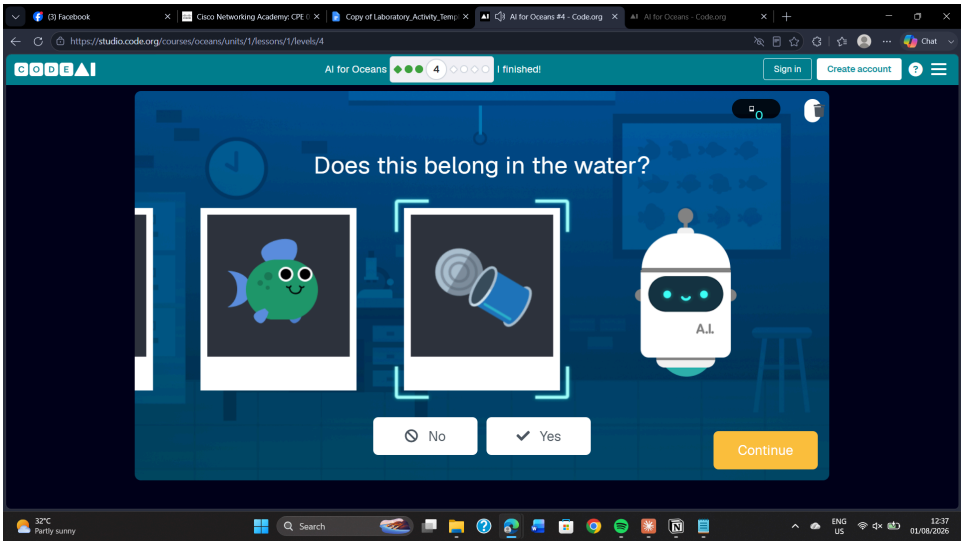

Figure 2.4.1: Water belongs detection

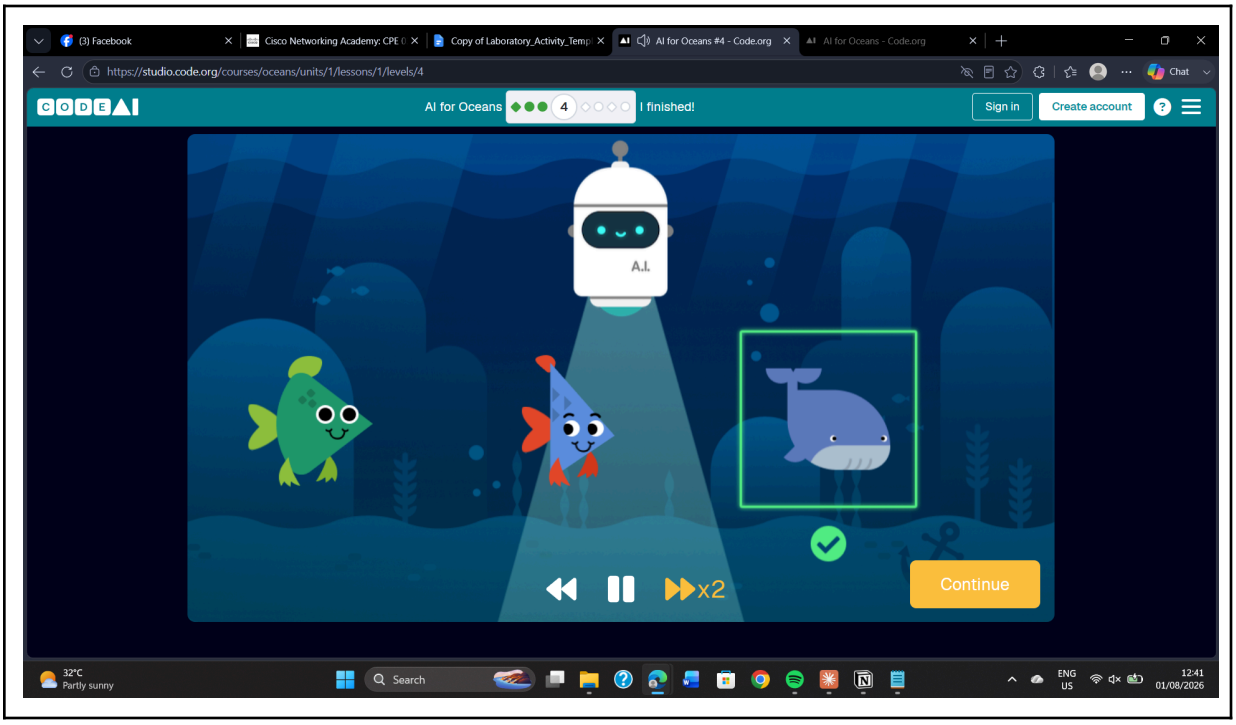

Figure 2.4.2: AI Detection

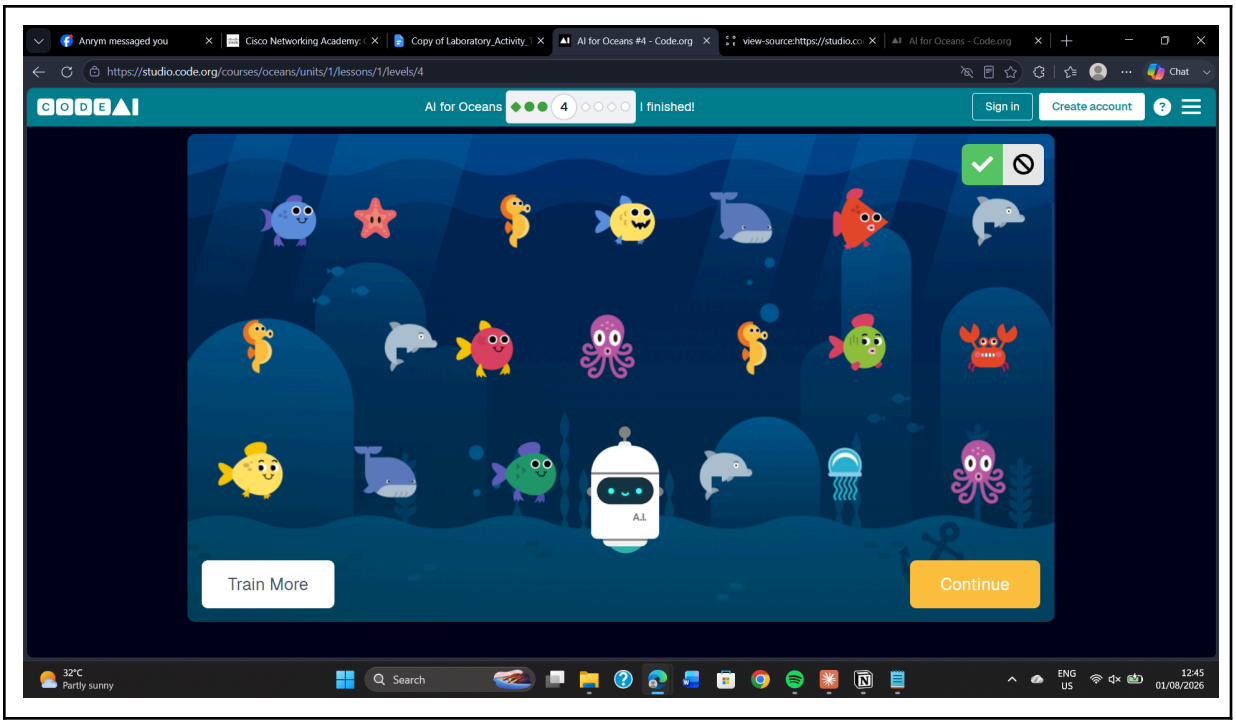

Figure 2.4.3: Data Collected by AI

STEP 5

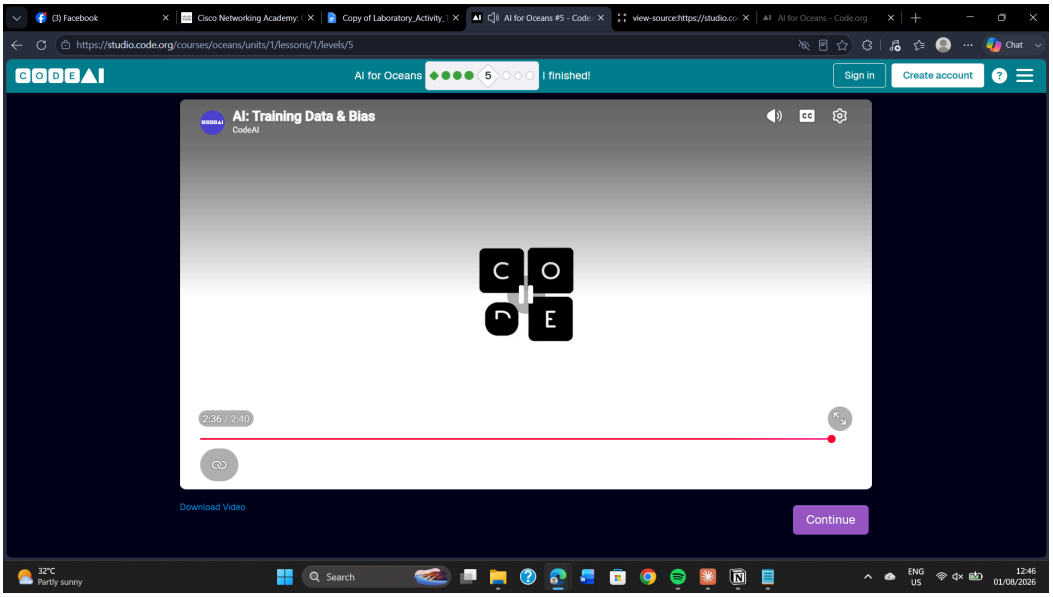

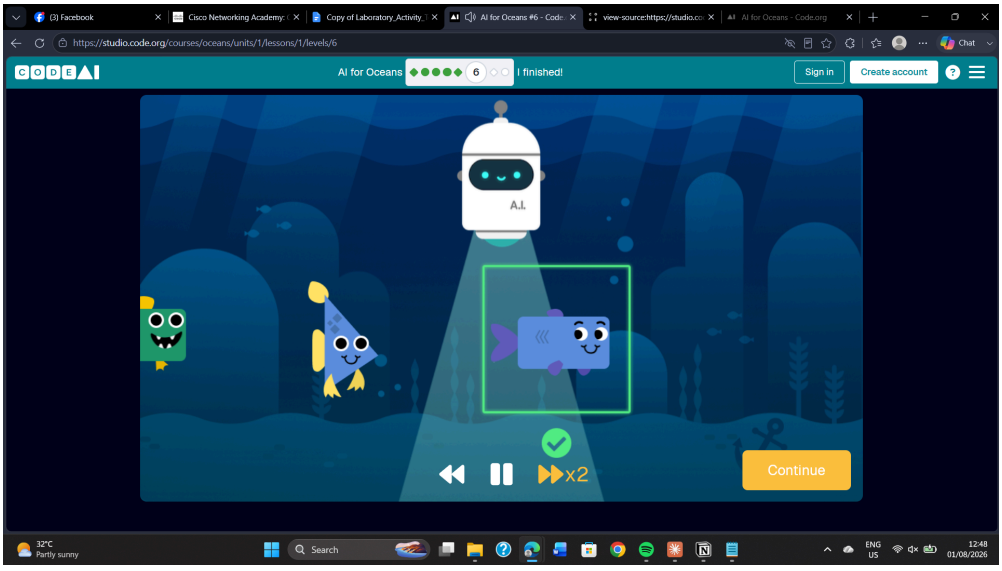

Figure 2.5.1: Video

STEP 6

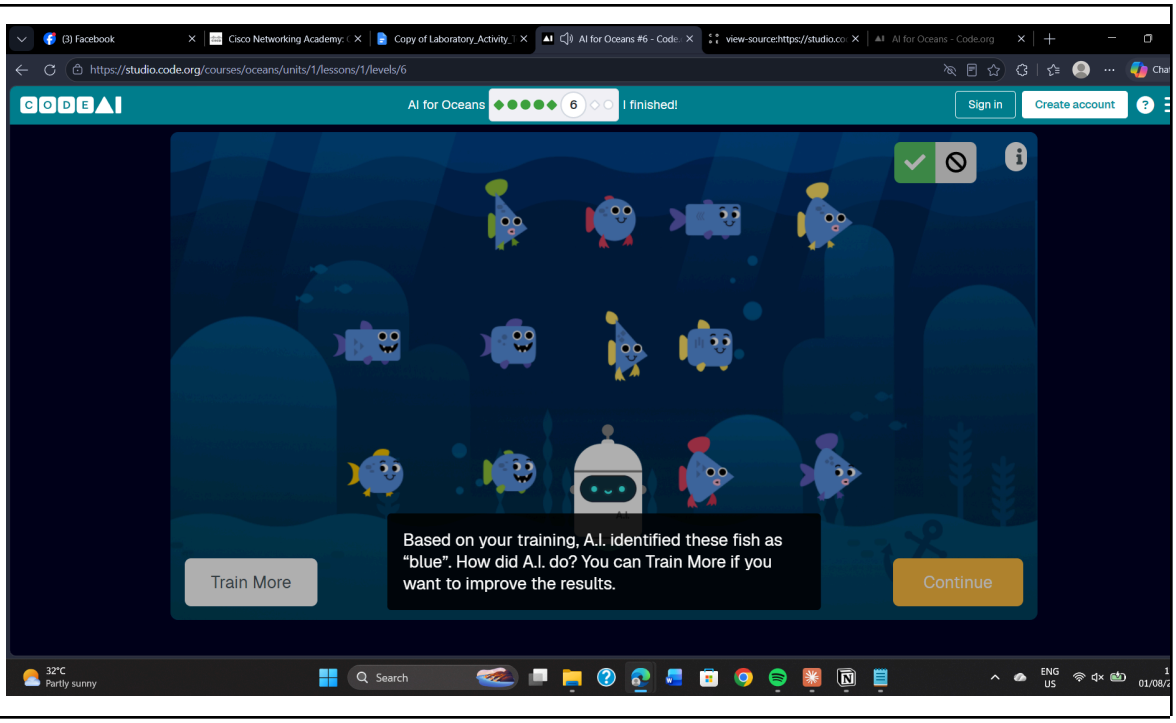

Figure 2.6.2: AI data collected

STEP 7

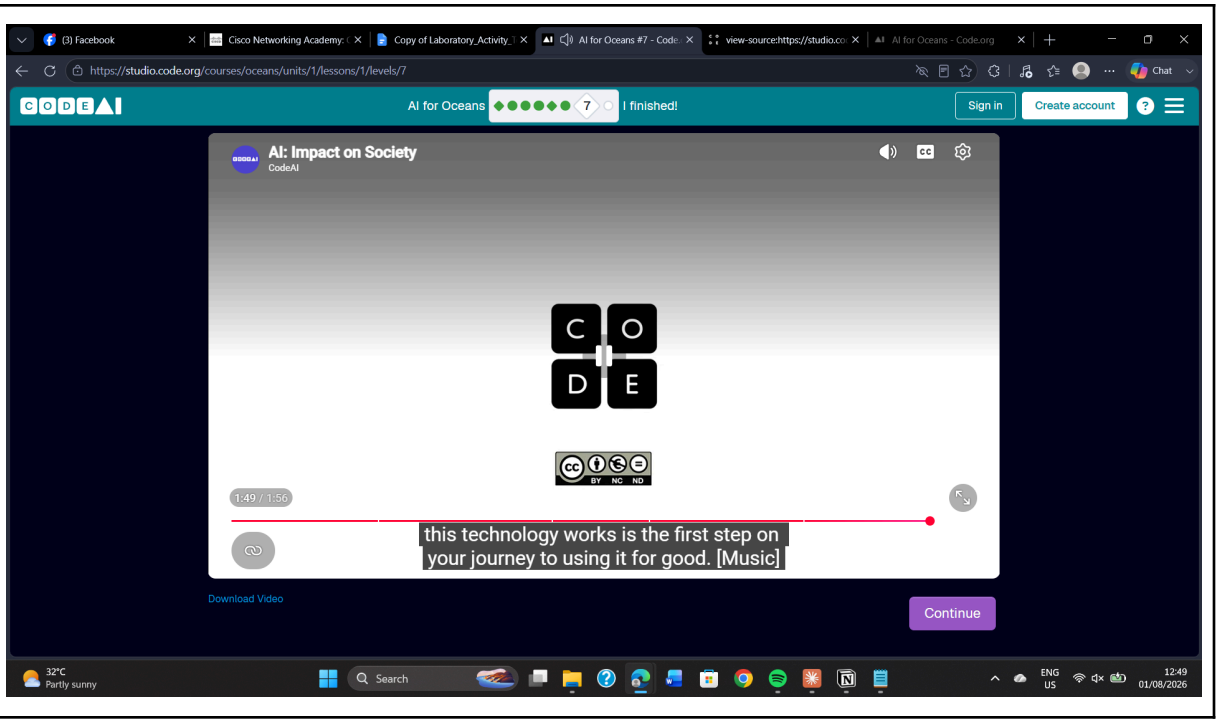

Figure 2.7.1: Video

Figure 2.8: Certification

Reflection/Analysis
In this activity, I learned about how AI detects the real world. I saw how the computer can learn to tell the difference between fish and trash in the ocean by looking at pictures. At first, the AI made some mistakes, but the more examples I gave, the better it became at guessing correctly. I also learned that AI is not perfect. It can be biased if we only teach it with certain kinds of examples. This showed me that the people who train AI need to be careful and fair when choosing what information to use.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: _____

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: _____

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: _____

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
