COMPUTER ENGINEERING

QUEZON CITY

COURSE CODE/TITLE:	Visualization and Data Analysis	**SECTION:**	CPE21S1
DATE PERFORMED:	October 7, 2026	**DATE SUBMITTED:**	October 9, 2026
NAME:	Mendoza, Ryo Shin P.	**INSTRUCTOR:**	Engr. Jimlord Quejado

ACTIVITY NO. 10.1 **The Power in Effective Storytelling**

1. PROCEDURE OUTPUT

Guide Questions:

1. What is the "power" in data storytelling that the speaker emphasizes, and why does she believe it matters in influencing decisions or actions?

- The power of data storytelling is making data easier to understand by explaining the meaning behind the numbers. It matters because it helps people understand problems, make better decisions, and take action based on the information presented.

2. How does she define or illustrate the role of audience awareness in crafting a data story?

- Audience awareness means understanding who will see the data and what they need to know. The presentation should match the audience's knowledge so they can easily understand the message and the importance of the information.

3. What example(s) does she give of a visualization or story gone wrong, and what are the root causes of the failure according to her?

- A data story can fail when it contains too much information, confusing charts, or no clear message. When the presenter focuses only on the numbers without explaining their meaning, the audience may struggle to understand the main point.

4. Which "preattentive" or design principles does she highlight as important for making charts communicate more clearly?

- Color, size, position, and emphasis help direct the audience's attention to important information. For example, using a different color to highlight a specific value makes it easier to notice. These principles make charts clearer and easier to understand.

5. Based on her advice, how would you redesign one of your own visualizations (or a chart you've seen) to better tell a story? What would you change and why?

- I would improve a bar chart by using simple colors, adding a clear title, and highlighting the most important result. I would also remove unnecessary details and include a short explanation of what the

data means. This would help the audience understand the message without getting confused by too much information.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: _____

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: _____

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: _____

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
